06/08/04 DRAFT

Fire Regime Condition Class (FRCC) Interagency Handbook Reference Conditions

Modeler: Ayn Shlisky, SteveDate: 6/8/04PNVG Code: CHAP2Barrett, Neil Sugihara

Potential Natural Vegetation Group: Mesic chaparral.

Geographic Area: California Northern and Southern Coast Ranges.

Description: PNVG occurs on north-facing slopes in Southern California below 3000 ft. elevation and all aspects above 3000 ft elevation; in Northern California PNVG occurs on all aspects above chamise (xeric) chaparral and below mixed evergreen forest.

Fire Regime Description: Fire Regime II, primarily short interval (e.g., 30-60 yr) stand replacement fires.

Class	Percent of	Description		
	Landscape	•		
A: post	10	Herbs, many pyrophyte endemics, grasses		
replacement				
B: mid-	50	>50% cover short-lived shrub species (e.g.,		
development		Artemisia caifornica, Baccharis pilularis,		
closed		Chrysothamnus spp.), some longer-lived		
		species		
C: mid- open	5	<50% cover Quercus dumosa/Q. berberidifolia		
•		(south) or Q. wislizenii (north); diversity of		
		shrub species, including Ceanothus,		
		Cercocarpus		
D: late- open	5	• • • • • • • • • • • • • • • • • • • •		
•		or Q. wislizenii; diversity of shrub species,		
		including Ceanothus, Cercocarpus		
E: late- closed	30	>50% cover Quercus dumosa/ Q. berberidifolia		
		or Q. wislizenii; diversity of shrub species,		
		including Ceanothus, Cercocarpus		
Total	100			
Fire Frequency and Severity				
Fire Frequency-	Modeled	Pct, All Description		

Fires

Probability

Severity

Vegetation Type and Structure

Replacement Fire	.0199	81	Occurs in all classes		
Non-Replacement	.0047	19			
Fire					
All Fire Frequency*	.0245	100			
*Sum of replacement fire and non-replacement fire probabilities.
